github.com/DorianKwan | bsayerskwan.dev | Reno, NV

PROFESSIONAL OVERVIEW

High agency senior full-stack engineer (~9 years experience) who thrives in ambiguity. Deep expertise in TypeScript, React, Node.js, full-stack architecture, cloud infrastructure, DevOps tooling, and applied AI workflows. Proven track record of owning products end-to-end: translating ambiguous requirements into scoped roadmaps, making pragmatic build-vs-defer calls, and shipping under strict deadlines.

SKILLS

JavaScript / TypeScript	React, Node.js, Next.js, NestJS	AWS, Docker, Kubernetes
Python, FastAPI, AI/ML Ops	TanStack Router/Query, Redux (RTK)	Git, Git Hooks, CI/CD
PostgreSQL, MySQL, Redis	Tailwind, Shadcn, Framer Motion	ESLint, Prettier, Husky
OpenTelemetry, Observability	JWT Authentication, Storybook, Vitest	Monorepo, pnpm, Claude Code

WORK EXPERIENCE

SENIOR SOFTWARE ENGINEER | Prove AI (Remote)

MAY 2024 – APR 2026

- **Saved project timeline (1+ month) by identifying critical deficiencies in contracted team's codebase;** provisioned a production-ready replacement as a contingency in three weeks; adopted by business
- **Built and open-sourced a lightweight, turn-key AI observability stack** using LiteLLM, OpenTelemetry Collector, and Prometheus to monitor LLM latency, token usage, and failures across AI workflows
- **Prototyped and evaluated AI/LLM systems** including; RAG pipelines, Nvidia NIM deployments, guardrails, model evaluation frameworks, and LLM data pipelines.
- **Scaled engineering team from 2 to 12 (600%) engineers** through three hiring rounds; designed and led technical interviews across Full-Stack Engineer, Senior Full-Stack Engineer, and Principal Applied AI Engineer roles

SENIOR SOFTWARE ENGINEER | Casper Labs (Remote)

AUG 2022 – MAY 2024

- **Founded engineering stack and standards for a greenfield team:** defined tech stack, app architecture, branching strategy, commit standards, PR workflows, app layer boundaries, & automated code quality enforcement
- **Led development of a core product;** an IBM partnered AI governance and compliance audit system (ISO 42001)
- Acted as de facto technical lead: **wrote and delegated tickets, conducted architecture reviews, drove cross-stack refactors, and mentored junior/mid-level engineers**
- Integrated Auth0 Universal Login authentication on a React SPA; with multi-org and role-based access support

WORK EXPERIENCE CONTINUED

FULL STACK SOFTWARE ENGINEER | Launchcode (Hybrid) | Calgary, AB, Canada

MAR 2020 – APR 2022

- **Delivered a critical fintech investment management platform on time** after inheriting it mid-build during a team reduction of 75%; maintained and extended it post-launch
- **Led full-stack development of a real-time machining floor management system from scratch**; live machine up/down tracking, efficiency scoring dashboard, & job scheduler with cascading time adjustments
- **Co-developed a Cisco-partnered telehealth platform for automated caregiving for high-spectrum autism patients**; integrated Webex APIs with Cisco touchscreen hardware and designed for a highly constrained, non-typical end users
- Took on expanded responsibilities beyond development: **led projects end-to-end, drove system design and cross-stack architectural decisions, and owned client-facing technical communication**
- Progressed from second-seat interviewer to leading the technical interview process independently; **co-designed the structured interview format, built the onboarding program, and trained others to run both**

FREELANCE WEB DEVELOPER | Mercenary Digital - Cossette - DDB | FT/PT | Hybrid

JUN 2019 – APR 2023

- **Delivered pixel-perfect, highly designed informational websites for digital marketing agencies** including Cossette, DDB Canada, and Camp Pacific under tight deadlines
- Converted complex, and editorial designs into responsive, accessible UIs; developed deep CSS fluency including viewport-relative units, ch-based typography, multi-breakpoint content reflow, and accessibility-aware styling
- **Progressed to Senior Web Developer at Mercenary Digital**; led projects end-to-end, estimated scope, mentored junior developers, and owned client communication

FULL STACK WEB DEVELOPER | Predicted Property | FT/PT | Hybrid

SEPT 2017 – MAY 2019

- Rebuilt a data scraping pipeline from a single ruby script file run manually to a Sidekiq worker queue scaling from 1 to 10 workers, cutting runtime by 80%; from 3-4 days to under half a day
- Surfaced 800+ missed leads during an unstructured data cleanup project – validating addresses, standardizing phone numbers, and pulling leads from free-form input.

EDUCATION

Diploma in Web Development | Lighthouse Labs, Vancouver, BC, Canada

Graduated: 2017
